Exchange Studies, Technikum Wien | August 2018 – February 2019
Exchange studies through ERASMUS during my 3rd year of studies. Attended courses in computer science and German language.

Experience

Software Engineer, Digital Edge | September 2021 (current)
As a software developer at Digital Edge, I've worked on various projects including solutions for financial institutions, automated telephone services, and data pipelines. Other projects involved developing a Q&A solution with text mining and software for Pepper Robots. I've also taught coding to children. My diverse experience in data engineering and software development, along with my ability to simplify complex technical requirements has been valued in many projects.

Regional Director in Linköping, We Know IT Sweden AB | February 2019 – September 2020
Project of interest: Project manager and architect for a full-stack web development project (~ 740 project hours) where we developed an E-commerce platform comparable to Blocket.se.
As a regional director my areas of responsibility was customers and project management. I was also part of the company's management team, developing the business model further. As a project manager I have participated in multiple development projects, coordinated clients' needs and a group of ~20 consultants.

Extracurricular activity

Clubmästeriet | July 2017 – June 2018
A student association of 13 members which plans and organizes the two-week introduction-period for the new students in addition to festive arrangements during the whole year.

Financial Officer & Vice Project Manager, I50 | November 2018 – October 2019
During 2019 the Industrial engineering and management program at the University of Linköping celebrated its 50th anniversary, I50. As part of a group of 9 members I participated in the planning and execution of a weeklong celebration. During each day of this week different activities was offered for students and alumnus. The largest event was a banquet attended by 500 guests with great success.
